

Senior Software Engineer

#111114

Position in Hopewell, NJ

At Semandex we make products and implement solutions to analyze and discover information in demanding data-rich environments. Our team of innovators is passionate about delivering high quality solutions that meet our customers' needs and help them achieve their missions.

If you want to work with positive people who enjoy and take pride in their work, we are looking for a self-motivated senior software engineer with Computer Engineering or Computer Science background. As a senior software engineer you will design, develop, test, implement and maintain code that is part of the most advanced intelligence analysis and digital forensics applications. You will have the freedom to experiment with the latest technologies and propose new tools and technologies. Meeting development delivery schedules, budget and quality objectives should be your key priorities.

Qualifications:

Applicants must have a BS in Computer Engineering, Computer Science or related field (MS is a plus). This position requires the ability to obtain a security clearance.

Applicants must have more than 4 years of experience as a software developer and proficiency in Java, C++, Python scripting language or similar, NoSQL databases (MongoDB, etc.), MapReduce architectures (Hadoop, etc.), HTML, CSS, JavaScript, and libraries such as JQuery, Open source web frameworks, agile development methodologies, and excellent communications skills. Ability to quickly learn, adapt and provide new pragmatic ideas as a part of a dynamic team of professionals. Proficiency in system and network programming and troubleshooting. Passion and intuition for application design, development and scaling.

Semandex Networks Inc. is an equal opportunity employer.
